

2024-2025 School Technology Plan

Every student enrolled at ThrivePoint Academy has access to technology both on campus and remotely. ThrivePoint Academy operates with an approved distance education program by the Nevada Department of Education and has established procedures to ensure students' and faculty technology needs are met to operate in both remote and hybrid programs

Access to Technology Equipment

- Students attending campus sessions use campus Chromebooks that are stored on campus during normal campus session hours.
- All students have the opportunity to checkout a school Chromebook to use during enrollment. Students first have the opportunity to checkout a Chromebook on during their orientation/first day of school. Students can also come to campus to checkout a Chromebook at any time during the school year.
 - To limit Chromebook damages, students that checkout Chromebooks are instructed to keep their checked out device at home for the duration of their enrollment. No deposit required.
 - When damage occurs to a Chromebook, students can trade the device for a functioning Chromebook. A repair fee may occur on after an initial replacement.
- All Staff are provided laptops, monitors, and docking station to conduct all school business

Access to High Speed Internet

- Students that do not have access to the internet at home may access the internet using public hotspots.
- Student Success Coaches will refer students in need of assistance to the school counselor.
 - The school counselor will assist students/families in need by referring eligible students to low-cost internet packages or providers through the Affordable Connectivity Program.
 - The school counselor will also connect students/families to the school's various community partners that may also be able to offer assistance as needed.
